Art Unit: 3751

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20 and 25-31, drawn to a bubble creation apparatus, classified in class 141, subclass 098.000.
- II. Claims 21-24, drawn to a container, classified in class 141, subclass 098.000.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed such as the particulars drawn to a *non-cylindrical/non-conical funnel*. The subcombination has separate utility such as use in a combined device not requiring a bubble creation device (e.g. a spittoon or a dropper-type container).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
